

Begin by opening a web browser and going to [docs.google.com](https://docs.google.com)

Select a new blank document.

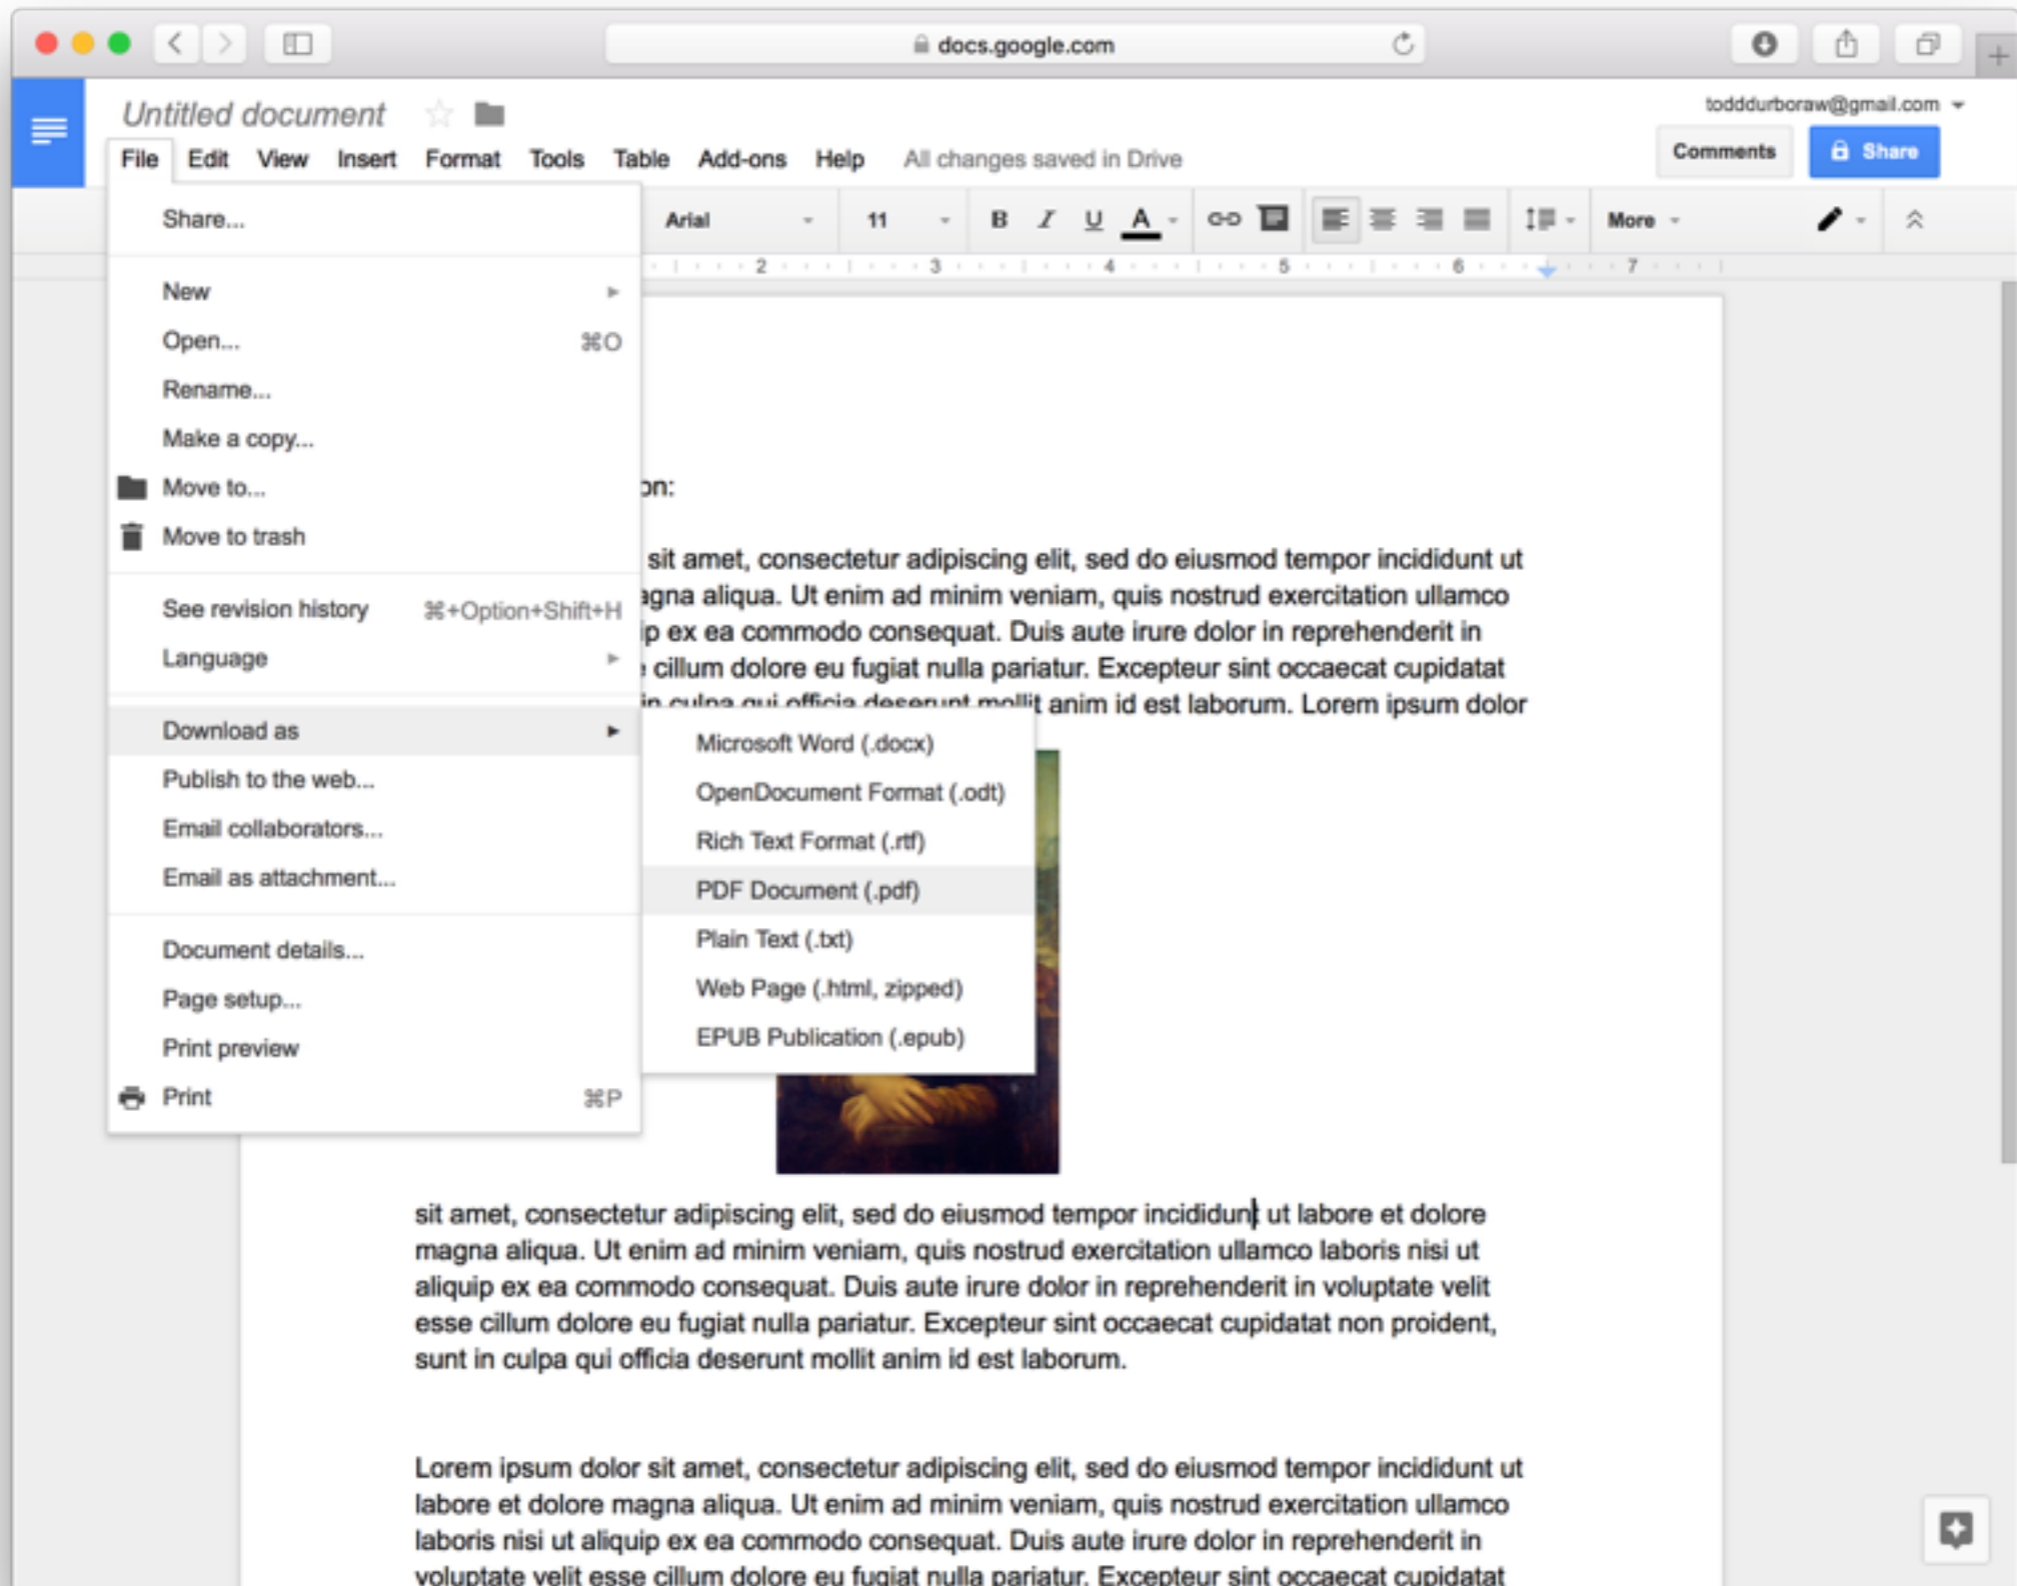

You've now made a new document that you can begin turning into your application.

So fancy!

When you're ready to make your application into a PDF, simply click on File > "Download as" > "PDF Document (.pdf)"

Nice work! You made a PDF! Remember to rename that file according to the SCCC rules (highlight the file and press Enter on OSX, or F2 on Windows)

**Lastname\_Firstname**  
**.pdf**
